

Today: String matching. 32.{0,1,2,3}.

Next class: Greedy algorithms. 16.{0,1,2,3}

Reminders: Portfolio/poster. Homework. Newsgroup. Reading. Coding. Practice.

1. List the members of your group below. Underline your name.

2. Trace the operation of the NAIVE-STRING-MATCHER algorithm on text **bananarama** and pattern **anar** using Figure 32.4 (p. 988) of the textbook as a template.

3. For the text `bananarama` and pattern `anar` (same as in Question 2), trace the actions of a finite-automaton matcher, using Figure 32.7 (p. 997) as a template.
